

North Pocono

In addition to an interest in science and math, Mike Felins pushes himself athletically.

The senior regularly participates in weeklong bike tours, “300 to 400 miles long.” In the summer of 2014, Mike rode across Iowa.

The son of Raymond and Kelly Felins, Mike is one of the captains of North Pocono’s Science Olympiad team.

He takes rigorous courses, including Advanced Placement physics II and calculus. Mike is also a member of the boy’s tennis team and last year was recognized as the MVP of the team.

Interested in spacecraft, Mike plans on becoming a mechanical engineer or working in the field of prosthetics.

“(To be able to) actually move and feel with the new technology is awesome,” he said of prosthetics.
