

1. Given the following graph:

- a) **Describe the motion** of each 2 second time interval, stating whether the velocity is changing or constant, is the object accelerating, is the object moving forward or backward, etc.
- b) Calculate the **acceleration** of the object at 1.5 seconds.
- c) Calculate the average **acceleration** of the object between 2 and 6 seconds.

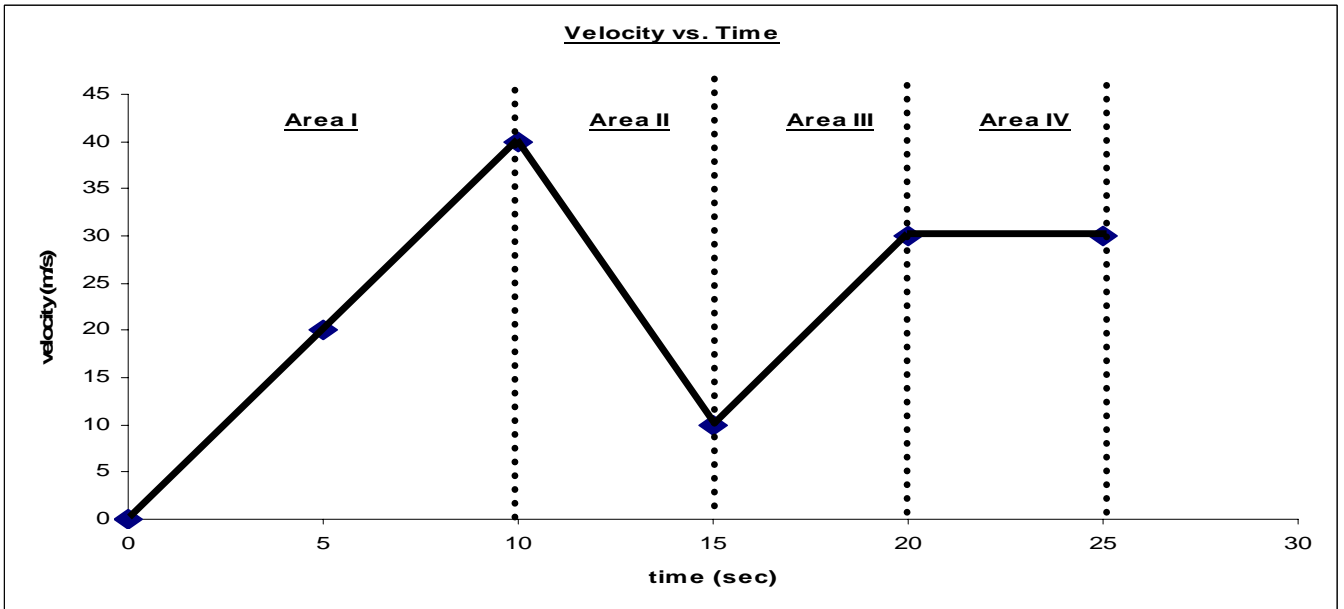

2. Given the graph below, determine the **displacement** of the object at $t = 40$ seconds, using **area under the curve** methods.

3. a) **Describe the motion** of the object during each of the marked time intervals.
 b) Calculate the **average velocity** of the object between 5 and 10 seconds, and again between 10 and 15 seconds.
 c) Calculate the **average acceleration** of the object during the 5 to 15 second time interval.

4. From the **v-t** graph below:
 a) **Describe the motion** of the object in each of the marked time intervals.
 b) Calculate the total **displacement** of the object at $t = 25$ seconds using **area under the curve** methods.

5. From the v-t graph below:
- Describe the motion** of the dirt bike in each of the marked time intervals.
 - Calculate the total **displacement** of the object at $t = 40$ seconds using **area under the curve** methods.
 - Construct the **a-t** graph that corresponds to this v-t graph.

Velocity vs. Time for a dirt bike

6. From the x-t graph below:
- Describe the motion** of the roller blader in each of the marked time intervals.
 - Calculate the total **displacement** of the object at $t = 14$ seconds.
 - Construct the **v-t** graph that corresponds to this x-t graph.
 - Write the equation of each line.

Position vs. Time of a roller blader

7. From the x-t graph below:

- Describe the motion of the bicycle in each of the marked time intervals.
- Calculate the total displacement of the object at $t = 14$ seconds.
- Construct the v-t graph that corresponds to this x-t graph.
- Write the equation of each line.

Position vs. Time of a bicycle

<p>For Graph 1:</p> <ol style="list-style-type: none"> 1. What is the position of the object at $t = 15$ seconds. 2. What is the instantaneous velocity at $t = 6\text{s}$? $t = 14\text{s}$? 3. What is the instantaneous acceleration at $t = 14\text{s}$? 4. What is the average velocity between $t = 12\text{s}$ to $t = 17\text{s}$? 5. Graph a v vs. t graph for this object. 	<p>For Graph 3:</p> <ol style="list-style-type: none"> 1. What is the instantaneous velocity of the object at $t = 7$ s? 2. What is the average acceleration between $t = 6\text{s}$ to $t = 10\text{s}$? 3. Graph an a vs. t graph for this object. 4. If an object is at position $x = 15$ at $t = 17$, what position is it at $t = 20$?
<p>For Graph 2:</p> <ol style="list-style-type: none"> 1. What is the average velocity between $t = 7\text{s}$ to $t = 16\text{s}$? 2. What is the average acceleration between $t = 18\text{s}$ to $t = 20$ s? 3. List all points that the <i>velocity</i> of this object is zero. 4. What is the instantaneous velocity at $t = 12\text{s}$? 5. Describe the velocity of this object throughout the time period. 6. What is the instantaneous velocity at $t = 15\text{s}$? 7. Graph a v vs. t graph for this object. 	<p>For Graph 4:</p> <ol style="list-style-type: none"> 1. List all points that the <i>velocity</i> of this object is decreasing positively. 2. List all points that the <i>velocity</i> of this object is constant. (+, -, or zero) 3. If an object has a velocity of 10 m/s at $t = 9$, what is its velocity at $t = 12$?
	<p>For Graph 5:</p> <ol style="list-style-type: none"> 1. What is the instantaneous acceleration at $t = 13\text{s}$? 2. What is the instantaneous acceleration at $t = 3\text{s}$? 3. List all points that the <i>acceleration</i> of this object is 0. 4. What is the average acceleration over the entire period of this graph?

Graph 2 -- x vs. t

Graph 3 -- v vs. t

Graph 4 -- a vs. t

Graph 5 -- v vs. t

Name: _____

For Graph 1:

- What is the position of the object at $t = 3$ seconds.
- What is the instantaneous velocity at $t = 5$ s? $t = 9$ s?
- What is the instantaneous acceleration at $t = 9$ s?
- What is the average velocity between $t = 3$ to $t = 7$ s?
- Describe the velocity of this object throughout the whole time.
- Graph a v vs. t graph.

For Graph 2:

- What is the average velocity between $t = 11$ to $t = 15$ s?
- What is the average acceleration between $t = 0$ to $t = 2$ s?
- What is the instantaneous velocity at $t = 9$ s? $t = 11$ s?
- What is the average velocity between $t = 0$ to $t = 2$ s?
- List all points on this graph where the velocity is zero.

For Graph 3:

- Graph a v vs. t graph.
- List all points that the *velocity* of this object is decreasing negatively.
- List all points that the *velocity* of this object is constant. (+, -, or zero)
- If an object has a velocity of 10 m/s at $t = 8$, what is its velocity at $t = 11$?

For Graph 4:

- What is the instantaneous velocity of the object at $t = 7$ s?
- What is the average acceleration between $t = 0$ to $t = 4$ s?
- Graph an a vs. t graph.
- If an object is at position $x = 3.5$ at $t = 4$ s, what position is it at $t = 6$ s?
- What is the instantaneous acceleration at $t = 5$ s? $t = 8$ s?
