Team excels at physics competition

Eighteen North Pocono students recently competed in the University of Scranton Kane Competition—a physics competition among 24 local high school teams based on the study of physics and its applications to real-life scenarios.

Held annually in the spring, the competition provides an event for local high school students to compete in six events using their knowledge of physics and science, as well as their common sense.

The North Pocono Team won the annual event and brought home the coveted Kane Traveling Trophy!

In addition to the team's success, Spencer Williams, a senior at North Pocono, finished third out of 162 students in the individual competition.

The Kane Test is a rigorous college level physics exam designed to

Team members include: Alison DePew, John Docalovich, Emily Donahue, Dylan Fantini, Tristan Flood, Kimberly Gaik, Alexander Gardner, Kyle Haddock, Kayla Limani, Kyle Major, Marissa Maurer, Aaron McNeal, Thomas Meehan, Carly Mischello, Shelby Mychayliw, Nicholas Russoniello, Joseph Stalker, Spencer Williams and David Yatsonsky. Coaches are: Mr. J. Croom and Ms. Nicole Furman. SUBMITTED

challenge students at all levels of physics.

The top three finishers in the test then move on to

a Jeopardy-type contest to demonstrate their understanding of physics-related topics.

Williams did an outstanding job in the Jeopardy round finishing third overall!
